Report by: Boma Miranda, Secretary, Ndes Foundation

For: Ndes Foundation/Ndes Institute of Technology Hub

Objective: Empowering Girls in IT

The NDES Institute of Technology, under the auspices of the Ndes Foundation, continued its commitment to empowering girls in the field of Information Technology with the latest installment of its course series. The third class of 2024 focused on the fundamental topic: Introduction to Computer Components.

The session, held on February 3rd, 2024, marked an essential step in bridging the gender gap in IT by providing comprehensive education and practical skills to young girls interested in pursuing a career in technology. The session was organized at the Ndes Institute of Technology Hub, with the invaluable collaboration of Privida Company, reinforcing the importance of partnerships in advancing educational initiatives.

Participants and Facilitators

The course was facilitated by Ma Nji Florence, a seasoned professional in the field of IT education. Ma Nji Florence's expertise and dedication were instrumental in delivering a high-quality learning experience. The Ndes Foundation staff, including Mrs Boma Miranda (Secretary), and Volunteer Miss Elma provided essential support, ensuring the smooth execution of the after exam revision.

Course Content and Activities

The lesson of today focused on corrections following the evaluation exam conducted in the previous session. Ma Nji Florence meticulously addressed each correction, providing detailed explanations and additional resources to reinforce understanding. She brought practical tools to help the kids identify parts of the computer they struggled to identify in the exams. The interactive nature of the session encouraged active participation and facilitated an optimal learning environment.

Key Learnings

Participants gained a deeper understanding of computer components, including processors, memory, storage devices, input/output devices, system unit and others. Through practical exercises and discussions, they honed their skills in identifying, understanding, and troubleshooting various components, laying a strong foundation for future coursework and professional endeavors in IT.

Feedback and Reflection

Feedback from participants was overwhelmingly positive, highlighting the effectiveness of the course content, facilitation, and interactive approach. Participants expressed increased confidence in their knowledge and skills, as well as excitement for future sessions. The success of the program underscores the significance of targeted initiatives in empowering girls and narrowing the gender gap in technology.

The third class of 2024 at the NDES Institute of Technology exemplified the commitment of the Ndes Foundation and its partners to fostering inclusivity and diversity in the field of Information Technology. By providing accessible education and support, the program continues to empower girls, equipping them with the tools and opportunities to thrive in the digital age. As the journey unfolds, the Ndes Foundation remains steadfast in its mission to create a more equitable and vibrant IT landscape.
